

#### **Pundit Ultrasonic**

# Pundit Lab (+)

# A flexible UPV test instrument designed for laboratory operations

# Reliability

Lab adaptations include an oscilloscope output, power supplied via a battery, mains, or via a USB connection to a PC. Full PC control of all functionality

# **Open Interface**

Removes the need to use the proprietary software. The open interface allows the instrument to be seamlessly integrated into the laboratory environment.

#### Ease of use

Increased receiver amplification allows optimum performance with exponential transducers which can be used on rough or curved surfaces, with or without coupling gel.
